

Hoiana Suncity Chooses Perfect Pay Baccarat for Optimal Chip Security and Game Efficiency

Suncity's HOIANA integrated resort opened with Walker Digital Table System's Perfect Pay Baccarat tables across the casino floor. Perfect Pay offers table game operators the most advanced solution for player rating and rolling program automation, chip security, and detailed data capture on VIP and Mass Market tables.

Macau, Macau S.A.R. July 20, 2020 – Last month, the Suncity Group welcomed invited guests to the Hoiana Resort's preview opening with Perfect Pay Baccarat installed across all gaming areas. Perfect Pay uses PJM3.0 (Mode 2) RFID, the most widely-adopted RFID in gaming specifically designed and enhanced for fast, reliable chip transactions on bet spots, in chip trays, and at casino cage locations.

Located along its stunning central coast, Hoiana is Vietnam's first and finest luxury integrated resort with upscale entertainment, sophisticated dining and drinking options, and world-class golfing at Hoiana Shores, the multiple-award-winning Trent Jones II-designed links course.

Emily Io, SVP Sales at Walker Digital, was closely involved in pre-opening activities. She noted that "Suncity Hoiana is distinguished by an elevated level of hospitality and world-class service that is complemented by Perfect Pay's discreet and seamless integration into the gameplay experience." Perfect Pay automatically and exactly tracks gameplay and table inventories while remaining indistinguishable from a traditional table design. "Perfect Pay brings together best-in-class game integrity, currency security, table automation, and data capture with players' preferred live-game experience, which is uniquely suited to Hoiana's focus on delivering a superior guest experience."

Craig Umaglia, Assistant Vice President of Table Games at Hoiana, commented, "Perfect Pay's continuous game integrity monitoring and automation of time-consuming operational tasks means that our table games team can spend more time

with our players, which is important." He added, "WDTS is also experienced with integrating its state of the art chip tracking system with our other casino systems, which gave us the flexibility we wanted during planning."

Neil Crossan, Chief Commercial Officer at WDTS, concluded, "We are very excited to be a part of this milestone in Suncity's expanding footprint in Asia, and look forward to the grand opening in the New Year."
