

Walker Digital Table Systems PJM3.0 RFID Table Games and Cage Solutions Available at Resorts World Las Vegas

Walker Digital Table System's PJM3.0 RFID solutions to power gaming chips, table games, and casino cage locations at the Strip's newest resort. The property also features the first North American implementation for WDTS's Perfect Pay Baccarat as well as Baccarat Insurance and Lucky 6, two popular baccarat side bets.

Las Vegas (June 24, 2021)- Walker Digital Table Systems continues its long and successful partnership with Genting as they bring the Strip's first complete RFID smart tables to Resorts World Las Vegas.

Walker Digital CEO Stephen Moore said, "We are honored to be a part of the newest resort on the Strip. Genting pioneered the most advanced casino floor in the world in Malaysia, and today they remain at the forefront of gaming innovation with the most technologically sophisticated integrated resort in North America." Neil Crossan, Chief Commercial Officer at Walker Digital, added, "Resorts World Las Vegas was our first customer in Asia and so it is fitting that they are our first customer in North America."

A key component of Resorts World Las Vegas's next-generation gaming experience is the selection of PJM3.0 RFID™, the industry-standard worldwide for fast, reliable and secure casino solutions. The comprehensive implementation includes WDTS-supplied components for RFID gaming chips, chip trays, bet tracking antennas, dealer antennas and casino cage readers. Resorts World Las Vegas also features WDTS's Perfect Pay Baccarat™ system, the only smart table that tracks wagers, game outcomes, payouts and perfect player ratings in real-time while delivering a live table game experience. Casinos using Perfect Pay experience a dramatic increase in game security and dealer accuracy while minimizing losses from human error, collusion and theft.

Resorts World Las Vegas is also the first to introduce two new baccarat side bets to Las Vegas that are popular today with players across Asia. The first is Baccarat Insurance, a new play option after the first four or five cards have been turned offered to players who are ahead at that point in the game to "insure" or hedge their

advantaged hand. This feature raises baccarat's low house edge while increasing both the volume of wagers on the table and player excitement. The Lucky 6 side bet pays either 12 to 1 or 20 to 1 on a winning banker total of six. For both bets, clear pay and take instructions on Perfect Pay's Dealer Display ensure accurate payouts and a consistent game pace.

Every gaming table at Resorts World Las Vegas features the Bravo Pit® game management system from Genesis Gaming Solutions Inc. The system features PJM3.0™RFID and vouchering technology, as well as the ability to accept cashless payments at table games. “We are pleased that Genesis chose WDTs’s PJM3.0 RFID to power their Bravo Pit and Cage products” said Stephen Moore, “Their choice underscores PJM’s position as the only secure and proven RFID protocol that meets the high-volume, high-speed requirements of the casino environment.”

###

About Walker Digital Table Systems, LLC

WDTs provides automation for live-dealt casino games that historically suffer significant reduced profit due to manual human processes. Its RFID-enabled Perfect Pay table system sets the standard for game security, accuracy and efficiency while delivering the player's preferred live gaming experience. WDTs solutions are powered by patented PJM3.0 RFID technology and are approved and live in multiple casinos across the Asia Pacific region and North America. WDTs also provides PJM3.0 RFID components to licensed casino chip and systems suppliers around the world.
